LINKWISE / KIWISDR FIELD TEST

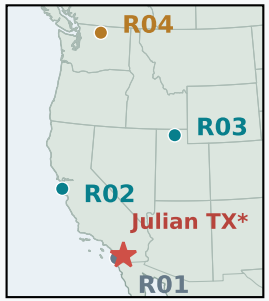

Candidate receive network from Julian, California

WGS84 geodesics · approximate transmit locality · candidate sites, not confirmed links

Azimuthal equidistant centered on Julian · rings show distance from TX

Western US detail

A staged receiver set

R01 nearby control
R02 / R03 / R05 pilot pool
R04 + R06–R10 expansion
R11 stretch candidate

Use at most three concurrent receivers in the first pilot. Owner access and RF readiness remain unconfirmed.

		km	bearing °T
R01	San Diego, CA	60	246°
R02	Half Moon Bay, CA / KFS Omni	713	314°
R03	Northern Utah / Kiwi 1	1,019	21°
R04	Winthrop, WA / MVARC	1,741	351°
R05	Maui, Hawaii	4,147	261°
R06	Washington DC area / NA5B	3,582	68°
R07	Tokyo, Japan / JK1LOT	9,048	307°
R08	Marahau, New Zealand / Kiwi 1	10,921	226°
R09	Santiago, Chile	8,796	142°
R10	Wessex, United Kingdom / G8JNJ	8,698	36°
R11	Gqeberha, South Africa / ZS2JB	16,538	102°

* Julian locality reference: 33.0787° N, 116.6020° W. Replace with actual antenna coordinates before execution.
